

ANCHOR PLATE FOR PROFILES 41 HCP - prosystemitalia.com

ANCHOR PLATE FOR PROFILES 41 HCP - Group 1831U

Application

Clamping element for bi-lateral attachment of crossbars to steel beams, independent from the channel's opening.

Installation

To be used in pairs.

Length calculation = Beam/Girder flange thickness + min. 2 x 50 mm overhang

Technical Data

Type	Max. perm. load tension	Tightening torque
M10	5,0 kN per U-Holder	30 Nm

Material: Steel, HCP

Type	For channel height [mm]	Max. flange thickness [mm]	Thread
41 - M10	20 - 62	16	M10
