

COLLAR TO U RUC I - prosystemitalia.com

COLLAR TO U RUC I

Application

Guided Support for the installation of siFramo Beam Sections, Channels 41 and steel girders (H-, I- and Double-U) to support overlying pipelines. This U Clamp can be used as an alternative for Non-Grip (Guide) U Bolt applications. The sliding plate reduces friction between pipe and substructure. The plastic layer and the sliding plate ensure a galvanic isolation between pipe and U Clamp as well as substructure, so it's possible to fasten e.g. stainless steel pipes.

Scope of delivery

U Clamp RUC I with pre-assembled plastic layer. Sliding plate enclosed.

Installation

Depending on the existing substructure the following options are possible:

- a) On top of siFramo Beam Sections with Self Forming Screws FLS
- b) On top of Channels 41 with bolts M10 and suitable Channel Nut
- c) On top of steel girders (H-, I- and Double-U) with bolts M10

Technical Data

Type	perm. load F_y [kN]	perm. load F_z [kN]
27 - 121	0.6	2.3
152 - 336	0.2	0.8

The perm. loads have been determined by load tests following DIN EN 13480-3 annex J.

For the installation on top of steel girders and Channels 41 the load capacities of these substructures (and connection parts) have to be verified.

Material:

Clamp body: Steel, HCP

Layer and sliding plate: Thermoplastic resins

Temperature range: -20°C to +90°C (at layer and sliding plate)

Type	NB	Material [mm]	B [mm]	L [mm]	Dimensions of elongated hole [mm]
