

# BRACKET WD F 100 140/140

## APPLICATION

Component to be used for connections between two F100 or F100/160 sections when the structural design requires an alternative to the End Support STA F 100 as the default solution.

Connections with the Corner Bracket WD F 100 allow flexible constructions and provide a high load capacity at the same time.

Using the bracket hole ( $\varnothing$  18mm) additional bracings can be installed and comprehensive solutions can be realized.

## INSTALLATION

To be used in pairs only. 8 pieces of Self Forming Screw FLS are necessary for one Corner Bracket.

## TECHNICAL DATA

Type	perm. tensile load bracket hole[kN]
WD F 100 140/140	45,3
