

HOLE SAWS - prosystemitalia.com

HOLE SAWS

APPLICATION

Hole Saw features Rip Guard[™], the strongest tooth form in the industry, backed by the Rip Guard[™] Limited Lifetime Tooth Break Warranty. Each tooth is built with more steel behind the cutting edge for added strength. The Rip Guard[™] warranty on tooth breaks is a first for the hole saw industry. The added tooth strength along with 8% cobalt give added life to the teeth, allowing for increased productivity on the jobsite, as well as continued hole quality. The Hole Dozer[™] includes Plug Jack[™], an all access slot design that allows for full access during plug removal. The Plug Jack[™] gives access lower into the cup for thick material and higher towards the teeth for thin material. With multiple positions to apply leverage and better plug access, Plug Jack[™] increases productivity and eliminates wasted downtime between holes.
