

HOLDING BRACKET HK 41 - prosystemitalia.com

## HOLDING BRACKET HK 41 - Group 1327

### Application

Safety element for channels to be used instead of simple washers. The Holding Bracket prevents the edges along the opening of the channels from bending, and ensures optimum load distribution. When loads are imposing along the channels, 41 Holding Brackets provide for additional safety due to embossed teeth, which bite into the channel. Suitable for single and double channels.

Special blanking guarantees high security and shear force after achieving form closure, especially for screwed through connecting elements.

### Technical Data

Material: cast iron, electro-galvanised.
